The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-4 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cassayre (U.S. Patent No. 6,933,260) in view of Meinke et al (U.S. Patent No. 5,208,222).

Cassayre discloses closely analogous avermectin derivatives having an aminosulfonyloxy group at the 4"-position. The only difference between the claimed compounds and the prior art compounds is that the claimed compounds are directed to avermectin monosaccharides while the reference's compounds are directed to avermectin disaccharides. However, since Meinke et al disclose interchangeability of alkylthio monosaccharide derivatives of avermectins and alkylthio disaccharide derivatives of avermectins (columns 4-5), a person having ordinary skill in the art at the

time the claimed invention was made would have been motivated to modify the compounds disclosed by Cassayre to monosaccharide derivatives in accordance with the teaching by Meinke et al because such a person would have expected the resulting compounds to possess similar activity.

Applicant's arguments filed November 1, 2007 have been fully considered but they are not persuasive.

Applicant contends that the compounds recited in the pending claims are sulfamate ester monosaccharide derivatives while Meinke et al disclose alkylthiomonosaccharide and alkylthiodisaccharide avermectin derivatives. This argument has not been found persuasive. Sulfamate ester disaccharide avermectin derivatives are well known in the art as disclosed by Cassayre. Instead of disaccharide avermectin derivatives disclosed by Cassayre, applicant now claims sulfamate ester monosaccharide avermectin derivatives. The Meinke et al patent was used only to show that to modify the sulfamate ester disaccharide avermectin derivative to sulfamate ester monosaccharide avermectin derivatives would have been prima facie obvious to a person having ordinary skill in the art at the time the claimed invention was made since both monosaccharide and disaccharide avermectin derivatives were well known in the art at the time the claimed invention was filed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1623

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
